## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

Claim 1 is pending and currently under examination.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rendered vague and indefinite by the confusing claim language recited. For example, it is impossible to determine what is meant by the phrase “detect the number of damaged RBCs and discriminate newly produced significant schistocytes from insignificant old schistocytosis”.

Claim 1 is rendered vague and indefinite by the use of the phrase “in 0.6% NaCl”. Is Applicant referring to a solution or is NaCl added to the blood sample?

Claim 1 is rendered vague and indefinite by the use of the phrase “analyzing by flow cytometry”. What is encompassed by said “analysis”? Is Applicant merely referring to the measurement of the labeled antibody?

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The stated goal of said claim is to detect hemolytic anemia. However, there is no

correlation between the recited steps of staining peripheral blood cells with anti-hemoglobin antibody and the stated goal of the claimed method.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over BD Biosciences (Technical Resources, BD Biosciences, 2000 page 176).

BD Biosciences disclose a method of staining whole blood for analysis by flow cytometry. Said method includes contacting the whole blood with a fluorochrome-conjugated antibody, incubating for 15 minutes at room temperature and diluting said mixture without washing. The disclosure by BD Biosciences differs from the instant invention in that the volume of whole blood used is 50 uL instead of 2 uL. However, this difference merely constitutes an obvious variation of the disclosed method.

***Conclusion***

No claim is allowed.
